

### **Errata For the First Printing of *Science in the Age of Reason***

**p. 12:** The text states that a hinny is hybrid between a female donkey and a male mule. However, as mules are sterile, that would be impossible. It should state that a hinny is a hybrid between a female donkey and a male horse.

**p. 192:** There should not be a plus sign at the end of the “older students” review.

**p. 224:** Step 20 is not as clear as it should be. You are attaching a *single* gumdrop that is the color of oxygen to the ends of all three toothpicks.
