

### Extra Problems for Chapter 5

1. Draw the Lewis structures for the following molecules:
  - a.  $\text{CF}_4$
  - b.  $\text{PHCl}_2$
  - c.  $\text{TeI}_2$
  - d.  $\text{Se}_2$
  - e.  $\text{CIP}$
2. Determine the shape and draw a stick figure for the molecules in problem #1.
3. For each of the molecules in problem #1, indicate whether it is polar covalent or purely covalent.
4. For each of the molecules in problem #1, indicate whether or not it is likely to dissolve in water.
5. Name the following molecules:
  - a.  $\text{CaCl}_2$
  - b.  $\text{N}_2\text{O}$
  - c.  $\text{SO}_3$
  - d.  $\text{N}_2\text{O}_4$
  - e.  $\text{C}_2\text{Cl}_2$
6. Order the following atoms in terms of increasing size: O, Cs, Al, Ca
7. Order the following atoms in terms of increasing electronegativity P, Ga, O, Rb, Ca
8. Which of the following molecules will have one or more purely covalent bonds?  $\text{CF}_4$ ,  $\text{O}_2$ ,  $\text{OCl}_2$
